

HEALTH INFORMATICS MICROCREDENTIAL

Upskill for Your Next Move in Healthcare

Powered by RISK **Amplified™**

Build Expertise That Employers Recognize

Health informatics roles are **growing 15% from 2024 to 2034** – much faster than the U.S. average.* There's never been a better time to position yourself for opportunities in a field transforming the future of health.

Designed by USF Health faculty, the **Health Informatics Microcredential** equips you with knowledge employers seek, aligned with the American Medical Informatics Association (AMIA) to deliver skills that improve patient care and organizational performance from day one.

Who Should Enroll

You! Whether you're a clinician moving into health IT, a data or IT specialist in healthcare, a manager seeking better decision-making tools, or pursuing AMIA AHIC certification—this program is built for professionals who want **real-world skills in health informatics**.

Earn a Credential

Wherever you work in healthcare—clinical, IT, operations, or management—this program equips you with the skills to connect data, technology, and care for better patient outcomes and stronger healthcare organizations.

Program Structure

This flexible, fully online program includes four courses — each designed for 24 hours of engaging learning, totaling 96 hours. You'll complete each course at your own pace, with personalized support from an AI teaching assistant. Choose to enroll in the full program for a comprehensive experience or take individual courses to fit your needs.

The microcredential is 96 clock hours of instruction and conferred by USF Health.

Course 1

Health Informatics in the Real World

Discover how health informatics connects to the issues you care about most. Through real-world case studies and low-stakes skill practice opportunities, you'll build a strong foundation in healthcare systems, data, and digital tools—and learn how to use them to drive smarter decisions and better outcomes.

Clock Hours: 24

Course 2

Designing Solutions for Healthcare Challenges

This course will help you build practical skills that stand out in today's healthcare landscape. You'll learn to apply design thinking, data insights, and digital tools to real-world clinical and operational challenges, while strengthening your abilities through case studies and hands-on practice.

Clock Hours: 24

Course 3

Making Technology Work for People

Dive into human-centered technology design and discover how ethical considerations and digital inclusion shape effective health solutions. Through real-world examples and hands-on activities, you'll discover what makes healthcare technologies practical and equitable, preparing you to make an impact in the field.

Clock Hours: 24

Course 4

From Ideas to Impact

Apply your knowledge through a meaningful, industry-focused project while developing leadership, problem-solving, and change-making skills. This capstone experience not only prepares you to drive impact in healthcare settings but also strengthens your professional portfolio, helping you stand out to employers and advance your career in health informatics.

Clock Hours: 24

Tuition & Enrollment Options
